## TPI Composites, Inc. Announces Second Quarter 2022 Earnings Results – Operational Improvements and Cost Reduction Actions Deliver Strong Net Cash Flow from Operations and Free Cash Flow in the Quarter

SCOTTSDALE, Ariz., Aug. 03, 2022 (GLOBE NEWSWIRE) -- TPI Composites, Inc. (Nasdaq: TPIC), today reported financial results for the second quarter ended June 30, 2022.

“Our second quarter results showcased our team’s continued focus on improving our operations and reducing costs in the midst of a challenging wind market,” said Bill Siwek, President and CEO of TPI Composites. “Our efforts in the second quarter drove utilization to 84%, consistent with our expectations, while also generating \$19.4 million of free cash flow.”

“While we expect volumes to remain suppressed in the near-term, we are committed to staying nimble during this time and have shown the ability to execute in this difficult environment. We are, however, encouraged by the proposed Inflation Reduction Act of 2022 and the stability the act could provide in the U.S. market as well as the impact this could have on demand should it ultimately get signed into law. In the meantime, we continue to listen and work with our customers to optimize our footprint to better serve their needs today and be best positioned to serve their needs once demand does recover.”

“In our transportation segment, supply chain issues for automakers have not improved and continue to negatively impact production volumes for the OEMs. As a result, our volumes in 2022 will be lower than we initially thought in this segment, however, our projected volumes for next year are expected to be higher than planned, and we remain confident about the prospects of our transportation business.”

“We are optimistic that the macro backdrop will improve aided by supportive country, state and local policy and legislation, as well as commercial and industrial demand and the advantages of the economics of wind in the United States, Europe and other regions of the world. That said, we will focus on execution in the second half of the year and the optimization of our geographic footprint to best meet the needs of our customers,” concluded Mr. Siwek.

KPIs	2Q'22	2Q'21
Sets <sup>1</sup>	783	843
Estimated megawatts <sup>2</sup>	3,410	3,303
Utilization <sup>3</sup>	84%	82%
Dedicated manufacturing lines <sup>4</sup>	43	50
Manufacturing lines installed <sup>5</sup>	43	51

1. Number of wind blade sets (which consist of three wind blades) produced worldwide during the period.

2. Estimated megawatts of energy capacity to be generated by wind blade sets produced during the period.

3. Utilization represents the percentage of wind blades invoiced during the period compared to the total potential wind blade capacity of manufacturing lines installed during the period.

4. Number of wind blade manufacturing lines that are dedicated to our customers under long-term supply agreements at the end of the period.

5. Number of wind blade manufacturing lines installed and either in operation, startup or transition during the period.

### Second Quarter 2022 Financial Results

Net sales for the three months ended June 30, 2022, decreased by \$6.4 million or 1.4% to \$452.4 million as compared to \$458.8 million in the same period in 2021 due to the following:

- Net sales of wind blades decreased by \$4.7 million or 1.1% to \$414.0 million for the three months ended June 30, 2022, as compared to \$418.7 million in the same period in 2021. The decrease was primarily driven by a 7% decrease in the number of wind blades produced due to a reduction in manufacturing lines and transitions of existing lines and currency fluctuations, which were partially offset by a higher average sales price due to the mix of wind blade models produced.
- Net sales from the manufacturing of precision molding and assembly systems decreased during the three months ended June 30, 2022, as compared to the same period in 2021 primarily due to a decrease in volume.
- Transportation sales decreased during the three months ended June 30, 2022, as compared to the same period in 2021 primarily due to a cumulative catch-up adjustment in the prior year as a result of a previous contract modification under one of our supply agreements.
- There was an increase during the three months ended June 30, 2022, as compared to the same period in 2021 in our field service, inspection and repair service sales due to an increase in demand for such services.
- The fluctuating U.S. dollar against the Euro in our operations in Turkey had an unfavorable impact of 3.1% on consolidated net sales for the three months ended June 30, 2022, as compared to the same period in 2021.

Total cost of goods sold for the three months ended June 30, 2022, was \$451.1 million and included \$2.5 million of costs related to lines in startup and \$7.5 million of costs related to lines in transition during the period. This compares to total cost of goods sold for the three months ended June 30, 2021, of \$450.5 million and included \$4.5 million of costs related to lines in startup and \$5.6 million of costs related to lines in transition during the period. Total cost of goods sold as a percentage of net sales increased by 1.5% during the three months ended June 30, 2022, as compared to the same period in 2021, driven primarily by an increase in direct material costs. Included in cost of goods sold for the three months ended June 30, 2022, is approximately \$8 million in non-restructuring related operating costs that were associated with certain manufacturing facilities in Newton, Iowa; Dafeng, China; and Juarez, Mexico, where production has stopped. The fluctuating U.S. dollar against the Turkish Lira, Euro, Chinese Renminbi and Mexican Peso had a favorable impact of 5.8% on consolidated cost of goods sold for the three months ended June 30, 2022 as compared to the 2021 period.

Income taxes reflected a provision of \$6.8 million for the three months ended June 30, 2022, as compared to \$28.9 million for the same period in 2021. The decrease in the provision was primarily due to the changes in the earnings mix by jurisdiction and an increase in the U.S. valuation allowance.

Net loss before preferred stock dividends and accretion improved from a loss of \$39.8 million for the three months ended June 30, 2021 to a loss of \$5.5 million for the three months ended June 30, 2022. Including \$14.6 million of preferred stock dividends and accretion, net loss attributable to common stockholders for the quarter was \$20.1 million, compared to a net loss of \$39.8 million in the same period in 2021. This improvement was due primarily to a \$22.1 million decrease in income tax expense and \$16.4 million in favorable foreign currency changes, partially offset by the increase in preferred stock dividends and accretion as well as approximately \$8 million in non-restructuring related operating costs associated with the three manufacturing locations where production has stopped.

The net loss per common share was \$0.48 for the three months ended June 30, 2022, compared to net loss per common share of \$1.08 for the three months ended June 30, 2021.

Adjusted EBITDA for the three months ended June 30, 2022 was \$10.3 million as compared to \$17.4 million during the same period in 2021. Adjusted EBITDA margin decreased to 2.3% as compared to 3.8% during the same period in 2021, primarily due to the non-restructuring related operating costs that were associated with the three manufacturing locations where production has stopped.

Capital expenditures were \$2.5 million for the three months ended June 30, 2022, as compared to \$8.3 million during the same period in 2021. Our capital expenditures primarily relate to machinery and equipment and expansion and improvements to our existing facilities.

We ended the quarter with \$155.0 million of unrestricted cash and cash equivalents, and net cash was \$92.7 million as compared to net cash of \$167.5 million as of December 31, 2021. Net cash provided by operating activities increased by \$31.9 million for the three months ended June 30, 2022, as compared to the same period in 2021. Net cash provided by financing activities increased by \$5.3 million for the three months ended June 30, 2022, as compared to the same period in 2021, primarily as a result of increased borrowings.

### 2022 Guidance

Guidance	Full Year 2022
Dedicated Manufacturing Lines	43
Wind Blade Set Capacity	3,710
Utilization %	80% to 85%
Average Sales Price per Blade	\$170,000 to \$180,000

#### Forward-Looking Statements

This release contains forward-looking statements which are made pursuant to safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include statements, among other things, concerning: growth of the wind energy and electric vehicle markets and our addressable markets for our products and services; the impact of the COVID-19 pandemic on our business, effects on our financial statements and our financial outlook; our business strategy, including anticipated trends and developments in and management plans for our business and the wind industry and other markets in which we operate; competition; future financial results, operating results, revenues, gross margin, operating expenses, profitability, products, projected costs, warranties, our ability to improve our operating margins, and capital expenditures. These forward-looking statements are often characterized by the use of words such as "estimate," "expect," "anticipate," "project," "plan," "intend," "seek," "believe," "forecast," "foresee," "likely," "may," "should," "goal," "target," "might," "will," "could," "predict," "continue" and the negative or plural of these words and other comparable terminology. Forward-looking statements are only predictions based on our current expectations and our projections about future events. You should not place undue reliance on these forward-looking statements. We undertake no obligation to update any of these forward-looking statements for any reason. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance, or achievements to differ materially from those expressed or implied by these statements. These factors include, but are not limited to, the matters discussed in "Risk Factors," in our Annual Report on Form 10-K and other reports that we will file with the SEC.

#### Non-GAAP Definitions

*This press release includes unaudited non-GAAP financial measures, including EBITDA, adjusted EBITDA, net cash (debt) and free cash flow. We define EBITDA as net income (loss) plus interest expense (including losses on the extinguishment of debt and net of interest income), income taxes and depreciation and amortization. We define adjusted EBITDA as EBITDA plus any share-based compensation expense, any foreign currency income or losses, any gains or losses on the sale of assets and asset impairments and any restructuring charges. We define net cash (debt) as the total unrestricted cash and cash equivalents less the total principal amount of debt outstanding. We define free cash flow as net cash flow from operating activities less capital expenditures. We present non-GAAP measures when we believe that the additional information is useful and meaningful to investors. Non-GAAP financial measures do not have any standardized meaning and are therefore unlikely to be comparable to similar measures presented by other companies. The presentation of non-GAAP financial measures is not intended to be a substitute for, and should not be considered in isolation from, the financial measures reported in accordance with GAAP. See Table Four for a reconciliation of certain non-GAAP financial measures to the comparable GAAP measures.*

Forward-looking statements contained in this presentation include, but are not limited to, statements about: i. the potential impact of the COVID-19 pandemic on our business and results of operations; ii. competition from other wind blade and wind turbine manufacturers; iii. the discovery of defects in our products and our ability to estimate the future cost of warranty campaigns; iv. the wind energy market and our addressable market; v. our ability to absorb or mitigate the impact of price increases in resin, carbon reinforcements (or fiber), other raw materials and related logistics costs that we use to produce our products; vi. our ability to procure adequate supplies of raw materials and components in a cost-effective manner to fulfill our volume commitments to our customers; vii. the potential impact of the increasing prevalence of auction-based tenders in the wind energy market and increased competition from solar energy on our gross margins and overall financial performance; viii. our future financial performance, including our net sales, cost of goods sold, gross profit or gross margin, operating expenses, ability to generate positive cash flow, and ability to achieve or maintain profitability; ix. changes in domestic or international government or regulatory policy, including without limitation, changes in trade policy; x. changes in global economic trends and uncertainty, geopolitical risks, and demand or supply disruptions from global events; xi. the sufficiency of our cash and cash equivalents to meet our liquidity needs; xii. our ability to attract and retain customers for our products, and to optimize product pricing; xiii. our ability to effectively manage our growth strategy and future expenses, including our startup and transition costs; xiv. our ability to successfully expand in our existing wind energy markets and into new international wind energy markets, including our ability to expand our field service inspection and repair services business and manufacture wind blades for offshore wind energy projects; xv. our ability to successfully open new manufacturing facilities and expand existing facilities on time and on budget; xvi. the impact of the accelerated pace of new product and wind blade model introductions on our business and our results of operations; xvii. our ability to successfully expand our transportation business and execute upon our strategy of entering new markets outside of wind energy; xviii. our ability to maintain, protect and enhance our intellectual property; xix. our ability to comply with existing, modified or new laws and regulations applying to our business, including the imposition of new taxes, duties or similar assessments on our products; xx. the attraction and retention of qualified employees and key personnel; xxi. our ability to maintain good working relationships with our employees, and avoid labor disruptions, strikes and other disputes with labor unions that represent certain of our employees; and xxii. the potential impact of one or more of our customers becoming bankrupt or insolvent, or experiencing other financial problems.

These forward-looking statements are only predictions. These statements relate to future events or our future financial performance and involve known and unknown risks, uncertainties and other important factors that may cause our actual results, levels of activity, performance or achievements to materially differ from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. Because forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified, you should not rely on these forward-looking statements as guarantees of future events. Further information on the factors, risks and uncertainties that could affect our financial results and the forward-looking statements in this presentation are included in our filings with the Securities and Exchange Commission and will be included in subsequent periodic and current reports we make with the Securities and Exchange Commission from time to time, including in our Annual Report on Form 10-K for the year ended December 31, 2021.

The forward-looking statements in this presentation represent our views as of the date of this presentation. We anticipate that subsequent events and developments will cause our views to change. However, while we may elect to update these forward-looking statements at some point in the future, we undertake no obligation to update any forward-looking statement to reflect events or developments after the date on which the statement is made or to reflect the occurrence of unanticipated events except to the extent required by applicable law. You should, therefore, not rely on these forward-looking statements as representing our views as of any date after the date of this presentation. Our forward-looking statements do not reflect the potential impact of any future acquisitions, mergers, dispositions, joint ventures, or investments we may make.

This presentation includes unaudited non-GAAP financial measures including EBITDA, adjusted EBITDA, net cash (debt) and free cash flow. We define EBITDA as net income (loss) plus interest expense (including losses on the extinguishment of debt and net of interest income), income taxes and depreciation and amortization. We define Adjusted EBITDA as EBITDA plus any share-based compensation expense, any foreign currency income or losses, any gains or losses on the sale of assets and asset impairments and any restructuring charges. We define net cash (debt) as total unrestricted cash and cash equivalents less the total principal amount of debt outstanding. We define free cash flow as net cash flow from operating activities less capital expenditures. We present non-GAAP measures when we believe that the additional information is useful and meaningful to investors. Non-GAAP financial measures do not have any standardized meaning and are therefore unlikely to be comparable to similar measures presented by other companies. The presentation of non-GAAP financial measures is not intended to be a substitute for, and should not be considered in isolation from, the financial measures reported in accordance with GAAP. See the Appendix for the reconciliations of certain non-GAAP financial measures to the comparable GAAP measures.

This presentation also contains estimates and other information concerning our industry that are based on industry publications, surveys and forecasts. This information involves a number of assumptions and limitations, and we have not independently verified the accuracy or completeness of the information.

## Appendix – Non-GAAP Financial Information

This presentation includes unaudited non-GAAP financial measures including EBITDA, adjusted EBITDA, net cash (debt) and free cash flow. We define EBITDA as net income (loss) plus interest expense (including losses on the extinguishment of debt and net of interest income), income taxes and depreciation and amortization. We define Adjusted EBITDA as EBITDA plus any share-based compensation expense, any foreign currency income or losses, any gains or losses on the sale of assets and asset impairments and any restructuring charges. We define net cash (debt) as total unrestricted cash and cash equivalents less the total principal amount of debt outstanding. We define free cash flow as net cash flow from operating activities less capital expenditures. We present non-GAAP measures when we believe that the additional information is useful and meaningful to investors. Non-GAAP financial measures do not have any standardized meaning and are therefore unlikely to be comparable to similar measures presented by other companies. The presentation of non-GAAP financial measures is not intended to be a substitute for, and should not be considered in isolation from, the financial measures reported in accordance with GAAP.
